

meteoblue Weather Professional

The "meteoblue Weather Professional" module provides you with an excellent overview of the weather data for your location. A multi-model gives you an overview of the most likely weather forecasts. With the historic weather data, a comparison between temperature and precipitation for the current year and the past 30 years is available.

The "meteoblue Weather Professional" module offers:

- various weather forecasts in a diagram (multi-model), so you no longer need to visit different weather websites, and it immediately provides you with a sense of forecast reliability.
- Historical weather data for the current year compared with the past 30 years, so you can assess the results of activities carried out in conjunction with weather information and compare with previous years.
- In future, there will also be features such as extensive weather analysis options (comparison of measurements – forecasts, observations etc.) and a rainfall radar directly on the farm map for certain countries.

Test conditions

- 10 days of free trial access
- The test phase ends automatically with no subsequent obligations
- Unrestricted functions during the test period

Price

- The minimum price for the module is 3.75 EUR/month plus VAT. This enables you to use the module for 50 ha.
- Tiered pricing according to size of the farm in ha; for example, the price for 100 ha is 6.25 EUR/month plus VAT (Price Calculator)
- The invoicing occurs monthly together with other booked modules, if applicable; in the first month of use with pro rata invoicing for the module

Contract terms

- Minimum term of one month
- After expiry of the minimum term, the contract is automatically extended each month by one month respectively
- After expiry of the minimum term, the contract can be cancelled at any time, taking effect at the end of the current accounting month
- The cancellation is implemented by termination of the module online via the 356FarmNet Shop
- The invoicing occurs together with other booked modules; in the first month of use with pro rata invoicing for the module, if applicable
- The invoicing is based upon the existing size of the farm at the end of the accounting month. Changes to the farm size affect the monthly price of the module.
